Creative learning in a variety of ways

Gonge products inspire and motivate children to be physically active. But more than that, they help them to learn and develop in creative ways. For more than 45 years, we have developed products that stimulate physical, cognitive and social development while having fun.

Play is the inspiration for all Gonge products, which are carefully designed to challenge children's physical limits, develop their cognitive skills and encourage social interaction. We believe that the development of body and mind is essential for building the confidence that children will depend on throughout life.

Every child is unique and deserves individual attention to help them develop while they play. We care for the specific needs of each child, at the functional level they require – from playful stimulation to therapeutic training to addressing specific needs. This approach helps children to grow, reaching new developmental stages and improving their functional levels. They may even use our products for training and rehabilitation in later life.

Our stimulating range of products combines educational principles, beautiful design, excellent quality and the highest safety standards. We remain loyal to our origins as a supplier to the educational market, yet our creative approach to learning has become increasingly popular with private families as well.

PLAYING SAFE

Gonge products are carefully designed, using specially selected materials, to comply with the highest international safety standards..

DEVELOPING STRENGTH AND CONTROL

Spinning, moving and using the body strengthens muscles and body control, while improving balance and stimulating the senses.

Physical

Gonge inspires and motivates children to be physically active. Our products will encourage children to start balancing, climbing, crawling, jumping, bouncing, spinning, walking on tip-toe, dancing and being physically active in as many ways as their imaginations and body will allow.

Gonge products can be used for anything from free play to specific therapy and structured training. Children will develop physical strength and motor skills – including weight transfer, familiarity with heights, physical coordination and agility – as well as sensorimotor abilities, such as awareness of posture, sense of touch and balance.

We aim to motivate and challenge children at any functional level to develop their confidence and physical abilities.

Cognitive

Body and mind cannot be seen as separate. When playing with Gonge products, physical activities and sensations do not go without a cognitive element, helping children to improve their cognitive abilities.

Basic cognitive functions, such as memory, concentration, problem solving and spatial orientation are all vital for many of the physical activities inspired by Gonge. This can be anything from estimating the distance before a jump, to developing new language skills when naming, sorting and giving words to the physical activity. And creativity is stimulated when imagination or curiosity is required, as well as when performing or story telling is driving physical activities.

Integrating physical activity with teaching has also been recognised as a learning tool with a considerable motivational potential, and sensory motor training improves learning through stimulation of the brain.

SHARPENS THE SENSES

Gonge challenges attention, perception, thinking and planning. All are important functions for learning.

LEARNING TO INTERACT

Gonge lets children play and move together, so not only do they develop their ability to move and balance, they also learn to be and interact with others in a group.

Social

Physical activity often involves social interaction. Gonge invites children to engage in activities which combine physical and social abilities. Children compete, race, role-play and perform, and they can do so with the aid of our products.

Group play will help to teach them cooperation and coordination based on physical interaction. They will then learn by imitating the actions of others – probably our most basic way of learning.

At Gonge, we are happy whenever we see our products being used in social activities, because we believe that every child best develops physically, emotionally and cognitively from the responses of others.

BUILD N' BALANCE®

Exciting and challenging balancing system. The elements can be combined in countless ways so use your imagination to set up all the balance courses and landscapes you can build. With the great flexibility of Build N' Balance®, the level of difficulty can be varied to suit the development levels of the children and can be built at heights ranging from 10 to 24 cm – depending on how brave the children are! Build N' Balance® is being constantly evaluated and developed, introducing new parts and features to offer even more challenging play opportunities. Maximum load 100 kg.

Build N' Balance® Course | Art 2229

This set includes 2 Top10, 3 Top24 (box 1) and 5 Planks (box 2).	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m³	Number of units in export carton	Export carton weight kg	Export carton volume m³
		Ø	L	W					
Box 1 (2 Top10, 3 Top24)	2-10				5.70	0.080	1	5.70	0.080
Box 2 (5 Planks)	2-10				12.10	0.020	1	12.10	0.020

Build N' Balance® Top10 | Art 2226

Made of plastic with artificial rubber edges to avoid slipping. Stackable for easy storage. Yellow.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m³	Number of units in export carton	Export carton weight kg	Export carton volume m³
		Ø	L	W

2229

2229 + 2223 + 2224 + 2225 x 2 + 2227 x 3

Build N' Balance® Planks | Art 2222

Set of 3 Planks made of plastic and strengthened with steel bars.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
	2-10	∅	L	W	H	7.00	0.010	3	21.80

Patent no. ZL201230340374.x

Build N' Balance® Triangular Platform | Art 2223

Made in plastic.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
	2-10	∅	L	W	H	3.00	0.020	1	3.00

Build N' Balance® Slack Line | Art 2224

Made of steel-reinforced plastic. Polyester line and metal tightening mechanism. Maximum load 50 kg.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
	4-10	∅	L	W	H	2.50	0.010	3	8.00

An element with a 5 cm wide 68 cm long belt to cross on the way to the next top (not included). A really great balancing challenge! The Slack Line can be tightened if required.

Build N' Balance® Rocking Plank | Art 2225

Made of plastic. Maximum load 50 kg.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
	3-10	∅	L	W	H	1.90	0.010	3	7.00

Element with integrated rocking function – the children have to transfer their weight as they move from top to top (not included). The plank moves 6 cm as it rocks.

Build N' Balance® Log Plank | Art 2228

1 Log Plank. Made of plastic	Age	Dimensions (cm)			Single unit weight, kg	Quantity in export carton	Colour
	4 - 10 years	∅	L	W	H	1.1	3

Log Plank has a curved surface which requires the child's complete attention and body control to keep his/her balance.

Build an obstacle for children to crawl under or jump over!
 With Build N' Balance®, bars and joints provide even more options for building play landscapes to challenge motor skills. Children can use the bars to build a tent by spreading a blanket over the bars. For safety reasons, the joints have been designed to allow the crossbars either to be mounted through the hole or placed loosely on top.

Build N' Balance® Bars and Joints | Art 2230

3 bars and 2 joints – artificial rubber	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m³	Number of units in export carton	Export carton weight kg	Export carton volume m³

Poster of thick polyester.

*Nothing can hold us back
when we learn the moves*

RIVER STONES

Stepping stones to better coordination, balance and fun. The River Stones are inspired by stepping stones in a river with each side of the triangle varying in steepness and difficulty. The purpose is to jump from stone to stone without touching the floor – you can vary the position of the stones to create more challenging paths for children. Each stone has a rubber rim on the base which prevent them from slipping, and also protect indoor floor areas. Provides challenging, active, imaginative fun. Builds children's confidence when jumping, judging distances, co-ordinating and balancing. Improved design of the original River Stones. River Stones can now be stacked so that they are practical to store. Incl. suggestions for games. Maximum load 100 kg.

River Stones | Art 2120

	Age	Product size (cm)				Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³

Set of 6 stones in 6 colours	2 - <					2.50	0.021	4	11.10	0.100
3 big stones		36	36	8.5						
3 small stones		25	25	4.5						

Design: Harrit & Sørensen
 Patent no. ZL201230344761.0

HILLTOPS

Five 'hilltops' in different heights which will inspire children to jump from top to top. Hilltops develop children's ability to estimate distances and make them familiar with heights. Each top is provided with a rubber rim which prevent them from slipping and protect the floor. Hilltops are made so that they can not overturn. Incl. suggestions for games.

Hilltops offers high play value and ample opportunity to develop and stimulate children's gross motor skills, social skills, and – not least – their creativity.

Hilltops | Art 2121

	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
		Ø	L	W					
Set og 5 tops in three heights	2 - <				4.80	0.057	3	15.80	0.180

1 tops		42	42	25.5					

Design: Harrit & Sørensen
 Patent no. ZL201230344761.0

MOUNTAIN

A large mountain (height 32 cm) designed to challenge children to reach the top by climbing up the broad steps. Stimulates infants to crawl up the steps, whilst older children can use the Mountain as stairs. Infants can experiment by jumping down from the Mountain, and the 4 plateaux suit different levels of daring! The Mountain is also ideal for use as seating. Can be used for movement stimulating play and exercise as a supplement to River Stones and Hilltops. Maximum load 100 kg.

Mountain | Art 2122

Fitted with non-slip rubber feet.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
		∅	L	W					
	2 - 8	65.5	49	32	2.30	0.100	6	14.30	0.230

Design: Harrit & Sørensen

ISLAND AND BRIDGE

Island and Bridge are elements designed to create totally new ways of playing and stimulating movement as a supplement to River. Combining Island and Bridge with River gives innumerable options for building landscapes for balance and movement. Made from durable plastic with anti-slip rubber edge. The Island will form the natural centre junction or "refuge". Bridge makes a challenging obstacle which children can balance on as they cross over. It can also be used in a cross format to represent a river running under a bridge.

Island | Art 2124

Set of two in the colours red and green.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
		Ø	L	W					
	2 - 8	43	43	7	1.80	0.018	3	11.60	0.110

European Community Design No. 463369-0001

Bridge | Art 2165

Set with 2 Bridge elements in yellow and blue.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
		Ø	L	W					
	2 - 8	50	14	7	1.00	0.007	8	9.40	0.080

Design: Harrit & Sørensen

RIVER

River provides unlimited possibilities for building balance paths! The elements are easy to join and very flexible, so only the imagination sets limits to the course of the river. Due to the size of the elements even small children will be able to build a "river". Made from durable plastic with anti-slip rubber edges, the river combines high quality with attractive design. The elements are stackable for easy storage. Can be combined with the "Island" and the "Bridge".

River | Art 2123

6 colours.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
		Ø	L	W					
7 elements	2 - 8				1.80	0.010	8	14.70	0.100

1 element		15.5	8.5	4.5					

Design: Harrit & Sørensen

European Community Design No. 438015

Patent no. ZL201230344106.5

GONGE

RIVER LANDSCAPE

An exciting balance landscape with no less than 25 elements which can be combined in any number of ways. This is a set able to provide innumerable options for balance training, movement exercises and group play. Play scenarios are included. Maximum load 100 kg.

Set includes:

River (21 elements) + Island (2 elements) + Bridge (2 elements).

River Landscape | Art 2166

Made from plastic with artificial rubber edges. 6 colours.	Product size (cm)				Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
	Age	Ø	L	W					
	2 - 8				8.20	0.050	1	8.50	0.050

Design: Harrit & Sørensen

*We imagine a
world of adventure
as we sense and explore
all the different shapes*

TACTILE DISCS

An inviting tactile material that challenges children's sense of touch on both hands and feet. At the same time, it develops the ability to describe sense impressions verbally. The tactile discs, made of nice-to-touch synthetic rubber, contain different tactile structures, each with its own colour. Each of the tactile structures can be found on a large disc for positioning on the floor, as well as on a small disc that the child will be able to hold in his/her hands. In terms of playing, the discs offer innumerable possibilities ranging from a fundamental sensing of the tactile structures to blindfold games based on memory and recognition. The games can be adjusted, so that they fit the child's age and level of functionality. Maximum load 100 kg.

Tactile Discs – complete set | Art 2116

A set of 10 different tactile structures in a range of colours (10 large and 10 small discs), a blindfold and a cloth bag.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³	
	2 - 8	Ø	L	W	H	11+27	5.2	0.031	3	16.7

Tactile Discs – set 1 | Art 2117

Contains 5 large and 5 small discs, a blindfold and a cloth bag.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³	
	2 - 8	Ø	L	W	H	11+27	2.70	0.016	4	11.5

Tactile Discs – set 2 | Art 2118

Contains 5 large and 5 small discs, a blindfold and a cloth bag.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³	
	2 - 8	Ø	L	W	H	11+27	2.70	0.016	4	11.5

Design: Debjerg Design

2116

2117

2118

SEESAW

Classic play equipment in a unique new design. Pliable synthetic rubber domes on the underside of the seesaw provide a softer, more dynamic movement. The seesaw has a non-slip surface. The base of the pivot is covered with synthetic rubber to reduce the risk of crushing and to prevent damage to the floor. Made in plastic with synthetic rubber cushioning. Maximum load 75 kg.

Seesaw | Art 2169

Classic play equipment in a unique new design.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
		Ø	L	W

Design: Harrit & Sørensen

European Community Design No. 001965989-0001

Patent no. ZL201230340347.2

FLOOR SURFER®

Roller board for play and therapy. The Floor Surfer® appeals to children and combines play and the training of motor skills. The Floor Surfer® has been developed in partnership with children's physiotherapists to ensure safe use by any child irrespective of motor skills level. The Floor Surfer® combines function, safety and design. Maximum load 100 kg.

Floor Surfer® | Art 2168

Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
	∅	L	W					
1/2 - 10	56	37	14	2.90	0.033	4	13.00	0.150

Design: Harrit & Sørensen
 European Community Design No. 10716488
 Patent no. ZL201230340445.6

- The wheels are screened to minimise the risk of running over the child's fingers (photo 1).
- Quality wheels with double ball bearings and non-smudging wheels in clear PU.
- The Floor Surfer® is slightly tapered at the front to give increased freedom of movement for the child's arms (photo 2).
- The raised front part of the Floor Surfer® supports the coccyx when the child is sitting (photo 3) and the sternum when child is lying down (photo 2).
- The narrow sides act as handles where the child's hands are protected by the protruding corners (photo 4).

GIANT MIKADO

Traditional game of pick-up sticks transformed into physically challenging motor skills-training equipment. The rules are the same, but the large scale of the pick-up “sticks” (length 140 cm, diameter 2.8 cm) changes the game. One or more children hold the poles before letting them go and running away at the same time. The game is on, and the children either take turns removing poles or agree to work together, making the removing of the poles – without moving the other ones – a team effort.

Giant Mikado is not only fun but also develops children’s physical, cognitive and social skills. Giant Mikado strengthens motor control, agility and, for the youngest players, muscle strength. At the same time it intensifies concentration and attention and also develops spatial orientation and planning skills. Giant Mikado stimulates children’s social skills, such as following rules, competing or joining forces to work together and coordinate the performance of a task.

- Safe: the pointed tips are made from soft artificial rubber with an air-filled compression zone.
- Simple colour indication of points is ideal for young children.
- The set consists of 20 wooden poles with artificial rubber tips packed in a fabric bag.

Giant Mikado | Art 2500

Made from FSC certified aspen wood and artificial rubber	Age	Dimensions (cm)			Single unit weight, kg	Quantity in export carton pcs	Colour
		∅	L	W			
	+ 5 years	150	18	18	11,5	1	Red, green, orange and grey

RING TOSS

A traditional game in a unique quality and design. The popular tossing game is challenging both physically and mentally as it requires concentration and body control to assess the distance and throw the rings with precision. At the same time, the game is fun as it can be used in many kinds of competition. The game includes two supports so that it can be placed at an angle to make the game easier for very small children.

Ring Toss | Art 2908

The game is made of metal and the rings of soft artificial rubber.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
	3 - <	∅	L	W					
		50	50	18	1.70	0.050	8	14.20	0.050

THROWING GAME

A functional construction with quality materials and elegant design. A large stand mounted with polyester bags in four different colours. The stand comes with six soft juggling balls. Suitable for small children +2 years.

Throwing Game | Art 2907

	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³	
	2 - 6	∅	L	W						H
		70			67	5.50	0.039	1	5.50	0.039

JELLYFISH

Jellyfish: a set of stepping stones made of soft, transparent artificial rubber. Jellyfish appeal to children of all ages, and are used for various motor activities, such as walking or jumping from one to the next. They are even safe for small children, as they are soft and only 2.5 cm high.

Fitting the star-shaped plastic inserts into the Jellyfish offers a unique cognitive activity and allows a wide range of play and educational possibilities. They can be easily inserted or removed from the bottom of the Jellyfish, and can be placed with the image face up (visible through the Jellyfish) or face down, depending on the activity. The inserts provide a flexible tool for various activities – ranging from basic recognition, through memory to specific educational training – simply by changing pictures on the inserts. Each set of Jellyfish comes with both pre-printed and blank inserts, allowing you to create your own pictures.

Memory | Art 2160, Set 1

Colour: Blue.	Age	Product size (cm)				Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
		∅	L	W	H					
	3 - 6	19		2.5		2.7	0.013	6	19	0.080

Intended for small children, this set includes 12 inserts with sea animals. Each animal appears on two inserts, inviting the children to engage in matching (pictures visible) or memory (pictures hidden) games. Set of 12 Jellyfish, 12 inserts with sea-animals (2 x 6 pictures) and 12 blank inserts.

Numbers | Art 2161, Set 2

Colour: Blue.	Age	Product size (cm)				Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
		∅	L	W	H					
	6+	19		2.5		2.7	0.013	6	19	0.080

A set of number inserts allowing various educational games, such as multiplying the numbers when jumping from one Jellyfish to the next. Set of 12 Jellyfish, 12 inserts with numbers (1-10, 20 and 30) and 12 blank inserts.

Sets of inserts can be ordered separately.

WIPPSIDER

WippSider and WippWalker offer a sensomotoric exercise system for balancing reactions and motor control. Active motor playing exercises are combined with very high motivating aspects and simple to use. Both the WippSider and WippWalker are made of highly durable plastic. Maximum load 120 kg.

WippSider | Art 2181

Colour: Blue.	Age	Product size (cm)				Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
		∅	L	W	H					
	3 - <	52	12.5	9		0.50	0.006	12	7.00	0.080

WIPPWALKER

By shifting his/her weight, the child will be able to “walk” with the WippWalker – but it is not easy, and small children will find it challenging. You “walk” by alternately putting your weight on one foot and simultaneously moving the WippWalker with the other.

WippWalker | Art 2180

Colour: Green.	Age	Product size (cm)				Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
		∅	L	W	H

AIR BALANCING BOARD

A unique balancing board for play and rehabilitation. The board consists of a hard plastic surface with non-skid elevations in artificial rubber to give a good foothold. This surface is supported by a soft, inflatable base that regulates the hardness of the balancing board using air pressure. Low air pressure makes the board soft so that it moves slowly and thereby becomes less challenging for motor functions while high air pressure makes the board hard and lively which makes great demands on motor functions. For rehabilitation the balancing board can continually be adapted to individual needs through adjustment of the air pressure.

BALANCING BOARD

These balancing boards are very suitable for balancing exercises and rehabilitation of both children and adults. Ideal for young children as the balancing boards are completely smooth all the way round. Material: Wood – the board is provided with a rubber cover.

GIANT BALANCING BOARD

For rocking from side to side, spinning around and balancing. Children can stand or sit on the board. With this toy children develop their motoric function and balancing abilities. With anti-skid profile and four integrated handle-bars. Both indoor and outdoor use possible. Maximum load 60 kg.

Balancing Board | Art 2102

ROUND SEESAW

The Round Seesaw amuses and excites children as it can move in all directions. The Round Seesaw is particularly suited for smaller children (age 3-5) and can be used by one child alone or two children simultaneously. The robust handles are covered with soft foam. Maximum load 60 kg.

BALANCO

Balanco is suitable for play, sports training and goal-directed rehabilitation. Balanco stimulates psycho and sensomotor functions, such as coordination, mobility, reaction, concentration, and improved posture. Balanco is available in two levels of difficulty. Each set contains 3 easily replaceable inserts with different challenges. Maximum load 120 kg.

BALANCE PLASTIC HEMISPHERES

Unique quality with anti-slip rubber profile. Plastic hemispheres that challenge anybody's balancing skills. You can try to walk on the hemispheres with either side – the flat or the round side – up. They do not slip as they are heavy and filled with sand. Can withstand damp if left outdoor on the playground. Maximum load 100 kg.

Balance Plastic Hemisphere | Art 2128

Colourful set of six in red, blue and yellow; two of each colour.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³

HEMISPHERE STILTS

Practices balancing skills on hemispheres. A different and better design. A unique and functional design adapting to the child's walking movements in a natural way. Maximum load 100 kg.

Balance Plastic Hemisphere | Art 2119

Made from plastic with anti-slip rubber profile. Colours: red, yellow and blue. Set of 3 pairs.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³
	5 - 8	15		7	1.20	0.012	4	5.60	0.050

MINI STILTS

Unique stilts especially developed for younger children. The hard rubber handles provide a good grip that can be adapted to the height of the child. Depending on how brave the child is, the child can adjust the height of the stilts using the loose plateaus (from 3 cm to 15 cm). Even small children are able easily and safely to mount or remove the plateaux. The Mini Stilts are easier for younger children to use than pot stilts or traditional wooden stilts. The handles allow an older child or an adult to help younger children who have not yet mastered the stilts on their own. Made of plastic base with sole and handle of artificial rubber. The four plateaux are made of plastic. Maximum load 100 kg.

Mini Stilts | Art 2195

European Community Design No. 2155747-0001.

Patent no. ZL201230340311.4

BIG FOOT STILTS

Our stilts suggest a jumbo foot – or gigantic (platform) shoes. The bending of the sole is adapted to the movements of the foot. The foot is red plastic with a strong black rubber sole. The aluminium stick is shaped to ensure a good grip. A black rubber knob at the end of the stick prevents children from getting hurt. Design, quality and joy of playing form a synthesis.

Maximum load 75 kg.

Big Foot Stilts | Art 2125

GO GO

Go Go – 3rd generation – in a modern design and improved quality. Go Go reflects the ambition to manufacture strong and beautiful toys that are safe, stimulating, and fun to play with. Our designers have given Go Go an up-to-date design, which combines panache with strength. On the basis of years of experience, we have created Go Go to fulfill the quality requirements set forth by child care centres. Maximum load 50 kg.

Go Go | Art 2138

GO GO BUS

The Go Go Bus with improved quality combining elegance and strength. The Go Go Bus reflects our aim of manufacturing sturdy and beautiful toys which are fun and safe for children and assist their motoric development. When two or three children “board” the Go Go Bus, they have to coordinate their movements, which children find both challenging and fun. Based on our many years of experience, we have designed the Go Go Bus to meet the quality demands made by child care institutions. Maximum load 90 kg.

Go Go Bus | Art 2139

Plastic wheels and rubber tyres, plastic pedals with steel reinforcements, a steel axle (Ø 14 mm).	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³

as I perform
and learn to do
incredible things*

CLOWN'S HAT

The Clown's Hat encourages small children to perform – because it is not easy to balance with something on your head! Concentration and balance are required to wear the Clown's Hat which develops body consciousness and attention to posture. Playing with the Clown's Hat can be both individually challenging and form part of competitive scenarios. The Clown's Hat is shaped to make it easy for small children to use and the parts are so soft that dropping the rings does not hurt.

Clown's Hat | Art 2127

Contains five parts made of artificial rubbers and EVA foam.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³

Patent no. ZL201230340444.1

BALANCING EGG

Inspired by cultures where the ability to carry things on one's head is a necessity, this Balancing Egg is unique in combining a lot of fun with awareness of posture and development of balancing skills. The base of the egg is a soft ring that adapts to the head of each child. The skill now is to build your egg, piece by piece, on this base. Younger children can start by balancing one or two pieces of the egg. To challenge those who have perfected the skill (not an easy task), place some items inside the egg or challenge your little Eggheads to a race!

Balancing Egg | Art 2129

Includes soft base made from artificial rubber and 5 plastic parts.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³

ACTIVITY RINGS

New, brightly coloured Activity Rings that appeal to children of all ages – and to adults. Activity Rings can be used as inspiration for countless activities such as dancing in a circle, walking on tiptoe in the rings, balancing the rings on your head, juggling rings on arms and legs, throwing rings to each other, jumping with rings around your legs, building figures – the combinations are limitless. The rings can be used in both spontaneous and structured activities during play, rhythmic and gymnastics. Suitable for individual as well as social activities. The Activity Rings are made of soft artificial rubber.

Activity Rings | Art 2190

Set of 6 rings in 6 colours.	Age	Product size (cm)				Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³

	1½ - <	16.4				1.50	0.009	6	9.80	0.060

 The fun is
here and now as
we train our balance 

SHOAL OF FISH

The shoal of small fish is ideal for free play, but also perfect for teaching situations. Children are able to hide small items in the 'belly' of the shoal fish as part of memory, sorting and naming games in linguistic or cognitive learning. The element of surprise in discovering what the fish has 'eaten' provides excitement and motivation for children and keeps their attention in a teaching situation. The small orange buttons on the shoal fish make it possible to 'catch' them with the fishing rod magnet (Art 2175). Children compete in catching most fish or in first finding a certain item hidden among the fish (memory game). Shoal with 5 small fish.

Shoal of Fish | Art 2176

Red EVA foam with orange metal buttons.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m³	Number of units in export carton	Export carton weight kg	Export carton volume m³

	3 - 6	15	9	5	0.35	0.005	8	3.70	0.050

Design: Harrit & Sørensen

FISHING ROD

With this fishing rod, children are ready for a fishing trip. The desire to catch a fish makes children challenge their attention, balance and hand-eye coordination. Getting close to the fish and getting it on the hook so that it can be landed require motor skills and mental concentration. Children can land the fish (boathook) or challenge themselves with a hook and line. Depending on the 'fish' to be caught, the 'fisherman' has to use the hook or the magnet on the hook. Shoal fish (Art 2176) are well-suited for use with the fishing rod, but many other items in the children's environment can also be 'caught'. The fishing rod is very versatile and can be used in imaginary and role-playing games that include interaction and language. Several children can also compete for 'Who catches the most fish without falling in the water?'.

Fishing Rod | Art 2175

The fishing rod is made of non-breakable plastic with artificial rubber handle. The rod has a strong ceramic magnet on the under of the hook. 1 unit included.	Age	Product size (cm)			Single unit box weight kg	Single unit box volume m³	Number of units in export carton	Export carton weight kg	Export carton volume m³
		Ø	L	W					
	2 - <	90			0.30	0.0015	8	3.00	0.016

High quality ceramic magnet

Design: Harrit & Sørensen

AQUARIUM & PLAYMAT

The "Aquarium & Playmat" has a unique ZipBin® design suitable for storage and use as a playmat (64 cm x 56 cm). Simply unzip the corner zips of the aquarium to unfold into a seascape. Suitable as an addition to Shoal of Fish (Art 2176) where children are able to catch fish in either the aquarium or the pond. The product's beautiful design makes it an attractive storage box for the Shoal of Fish and other toys.

Aquarium & Playmat | Art 2177

GONGE®

MINI TOP

The Mini Top was developed with particular focus on the motor-skill development of children aged 0-4.

The Mini Top invites young children to teeter, swing and spin around – at first with the help of an adult and subsequently on their own. It encourages motor activities which are important for a child’s early development of his/her sense of balance (the vestibular system) and motor control.

The shape of the Mini Top makes it safe for young children: it is dimensioned (diameter 68 cm, depth 26.5 cm) to be big enough, but not too big, for young children. The geometric shape ensures that the tilting motion gradually slows down and prevents the child from tipping over at the same time. The Mini Top has been carefully designed to make sure that both the child’s head and fingers are protected during play. Simple, functional design.

Mini Top | Art 2099

Made of plastic.	Age	Dimensions (cm)			Unit weight, kg	Quantity in export carton	Colour
		Ø	L	W H			
	0 - 4 years	68		26,5	1.6	16	Orange

European Community Design No. 2155747-0005

The vertical edge protects the child’s fingers and head from getting squeezed.

TOP

A wonderful giant top for hours of fun. Top for 1 or 2 children. Lots of uses: use it to rock from side to side, spin it, build a den, etc. Small children can even use it as a boat in the pool (only under adult supervision). Develops children's physical coordination while they play. Made of strong plastic for both indoor and outdoor play. Very suitable for basic physical coordination training with disabled people.

Top | Art 2100

6 pieces.	Age	Product size (cm)				Single unit box weight kg	Single unit box volume m ³	Number of units in export carton	Export carton weight kg	Export carton volume m ³

	3 - 10	80		44		3.00	0.028	33	111.10	1.640

Patent no. ZL201230342830.4

Take a good look at our original top. Only the original top is shaped with a pointed centre. This enables children to get the feeling of turning upside-down when moving the top 360° around the centre (photo 1).

The edge of the top protects children's heads and hands from getting hurt (photo 2+3).

Raised edges prevent children from getting their fingers caught under the top. At the same time there is no risk of suffocation if children hide inside the top (photo 4).

ROCK AROUND

A spherical rocking toy for indoors or outdoors. Children can sit in it and rock it from side to side, or spin around. There is even room for two smaller children to sit in it together. Users can hold on to the rim without getting their hands jammed between the rim and the floor. Develops physical coordination skills.

Suitable for water and sand. Including lid.

BABY TRAMPOLINE

On this trampoline very small children can practise trampoline jumping. The canvas is tensioned such that even small children will experience a springing effect which they would be too light to feel on ordinary trampolines. The spring sheet is only 12 cm above the floor. The rubber cover yields protection against the metal frame and the supporting handles are covered with foam to protect face and teeth. The construction is solid – beautiful design combines simplicity and function. With focus on safety - for children up to 20 kg.

*Together, we can fly high
and wide across the skies*

PARACHUTE

Playing with the parachute provides exercise for the whole body – for everyone! A wonderful way of developing basic physical coordination. Inspires many types of activities for groups of children or grown-ups. Made of colourful, lightweight, fire-resistant polyester. Very strong handles.

The parachutes have a strong 10 mm thick rope sewn into the outer edge, allowing an almost unlimited number of people to play at the same time.

Maximum load 10 kg.

Playing with the parachute | Art 2903

Great ideas for playing with the parachute. Text in English, German and French.

PARACHUTE ENCOURAGING EXERCISE

Book with inspiration, play ideas and background for activities involving parachutes. The book provides very detailed descriptions of how the parachutes can be used in educational work in childcare centres and schools. The book is full of play ideas for children to create fun and meaningful physical activity. The book also describes how parachute games stimulate social and intellectual development. Available in 6 languages. 56 pages with colour illustrations.

MIRROR GAME

An exciting game with mirrors - both amusing and instructive. Start by turning up a pattern card. Each player must then attempt to form a mirror image of this pattern using 2 bricks and a mirror. The first one to succeed wins the pattern card. Using the mirror can be tricky, and an understanding of the symmetry of a pattern is an advantage in this game.

BLOW LOTTO

A unique, highly amusing game – develops breathing control and lip muscles! The players take turns at blowing the ball from one hole to another, which requires control of the direction and speed of the ball. 9 holes show different pictures, which are also featured on the players' lotto cards. The first player to cover all pictures is the winner.

TURBINO

Turbino is a spellbinding blowing game. It's easy to blow the propeller into motion – but it's not easy to control it to stop at a specific square! Turbino is a challenge and fun for all children. At the same time it develops their breathing control making. Turbino very suitable for training children with speech disorders. The game contains two picture circles with different degrees of difficulty.

RETAIL PACKAGING

Gonge is currently developing retail packaging for the company's most popular products. Text and images on the packaging will efficiently communicate product characteristics in six languages. The new packaging is our response to the increasing demand for our products from parents and other private consumers.

MOTOR SKILLS DEVELOPMENT SET

Art 2600

Complete motor-skills development set comprising the best Gonge products! Play forms the basis for learning! This motor-skills development set is designed to enhance motor, cognitive and social skills ... and also to stimulate the senses and awareness of colours. The set provides ample opportunity for fun play, both individually and in groups. Several products also include a guide to help inspire both play and learning.

Art 2600 contains following products:

FloorSurfer | Art 2168

Seesaw I | Art 2169

River Stones | Art 2120

Giant Top | Art 2100

Activity Rings | Art 2191

Hill Tops | Art 2121

Clown's Hat x 2 | Art 2127

Tactile Discs | Art 2117

River | Art 2123

Gonge – from education to creative learning

The Gonge family started “Skoleforlaget Gonge” in 1966, manufacturing and marketing educational products for schools in Denmark. Since then, the Company has grown and developed into a global leader in creative learning.

A tipping point of the Company came in 1986, with a single product – ‘Top’ – laying the cornerstone for a range of motor training products, as well as becoming the inspiration of the iconic logo. This grew into a wide and varied range of educational products, and a philosophy of stimulating physical activity to aid the cognitive and social development of children.

Gonge and Winther playing together

Gonge develops toys and educational products that stimulate play and physical activity for “creative learning”. Winther produces bikes, tricycles and other wheeled toys for “learning by moving”. These two philosophies matched so well that merging the companies was a natural development.

Gonge and Winther supply kindergartens and schools globally, as well as private families. The brands’ product ranges complement one another to offer a great variety of ways for children to play, move and learn.

Gonge merged with Winther on the 1st of July 2010. All subsequent trade of Gonge products, and all contacts, are handled through A. Winther A/S.
